

Celsia's new web-enabled multizone system delivers total temperature control – wherever you are

At Celsia we're always looking for better ways to control energy consumption and keep our customers ahead of the competition, so our market-leading wireless zone control system is now multizone and web-enabled too!

We've developed our market-leading wireless zone control system to include remote communication - using a gateway that simply plugs into your router. Your electric heating can now be zoned, programmed and operated from one central point - via the internet*.

Convenient web-enabled temperature control

Our battery powered wireless thermostats simply connect wirelessly to the heating appliance(s) and the gateway that is controlled and programmed using the Celsia Multizone web app.

Celsia multizone overview

The Benefits:

For You

*Value added product for customers
– saving money and energy*

Easy to install

*Demonstrates you're ahead
of the competition*

Tried and tested technology

Easy to upgrade existing products

Product can be white labelled

For End Users

Save money

Reduce energy consumption

Easy to use

7 day programme to meet lifestyle needs

Can be used in up to 10 zones

*Can be operated from a computer, laptop,
tablet or smart phone*

* Optionally the gateway can be connected directly to a PC using the USB cable provided and controlled using our Celsia Multizone User Interface PC program.

Features

1. System can be easily extended to control up to 10 zones
2. Celsia Multizone Web app can be operated from any mobile device such as phone, tablet or PC connected to the internet *. See at a glance what the temperature is in each zone
3. Access the system anywhere, anytime remotely. Change the program, advance or boost the heating
4. Wireless connection between the zone thermostats, the heating appliance and the Gateway means that installation is simple
5. Multiple heating appliances can be connected to a zone thermostat, making the system expandable and flexible
6. Zone thermostats have a 2 year battery life
7. Accurate temperature control, saving energy and money

Ideal for property owners & managers

It's a fantastic product for commercial and private landlords, in particular for properties which are empty for extended periods of time. What's more, a Celsia multizone thermostat with no user adjustments can be used in zones where on-site control is not required.
